

PROteo

3 and 5 passengers

Performance and elegance

The perfect example of the way we listen to and understand your desires, habits and requirements; Proteo is a serious tool, conceived and developed by and for the professional.

Proteo harnesses the best of THEAULT's knowledge, experience and foresight together with classical design, flowing lines and fine finish to add style and elegance to the durable performance. Every detail is thought out and tested to make using your Proteo both practical and enjoyable.

Quickly adapt the space to suit your horses with a sliding partition adjustable to seven width positions. Load and unload from the spacious stalls easily on the low, wide ramp appreciating the ease with which the sprung ramp lifts and the doors click shut. Relax in the comfort afforded to you and your horses by the higher quality body panel insulation. Profit from the increased power, fuel economy and improved service intervals of the latest generation engines.

Proteo, safety without compromise

1.2 metre wide rear door with a choice of 3 formats.

Easy access to your horses and equipment. Quick-release breast bar which unlocks easily in case of necessity

A numerous range of options permitting you to personalise your Proteo to meet your expectations.

Franck Nivard

Trainer, jockey, driver and 3-times winner of the Prix d'Amérique

"Proteo is THE vehicle adapted for our job; practical and reliable, it is my work tool."

Proteo is available in 3 and 5 passenger versions and with chute stalling (Stud model).
